How Your Clients Can Make Payments in LollyLaw

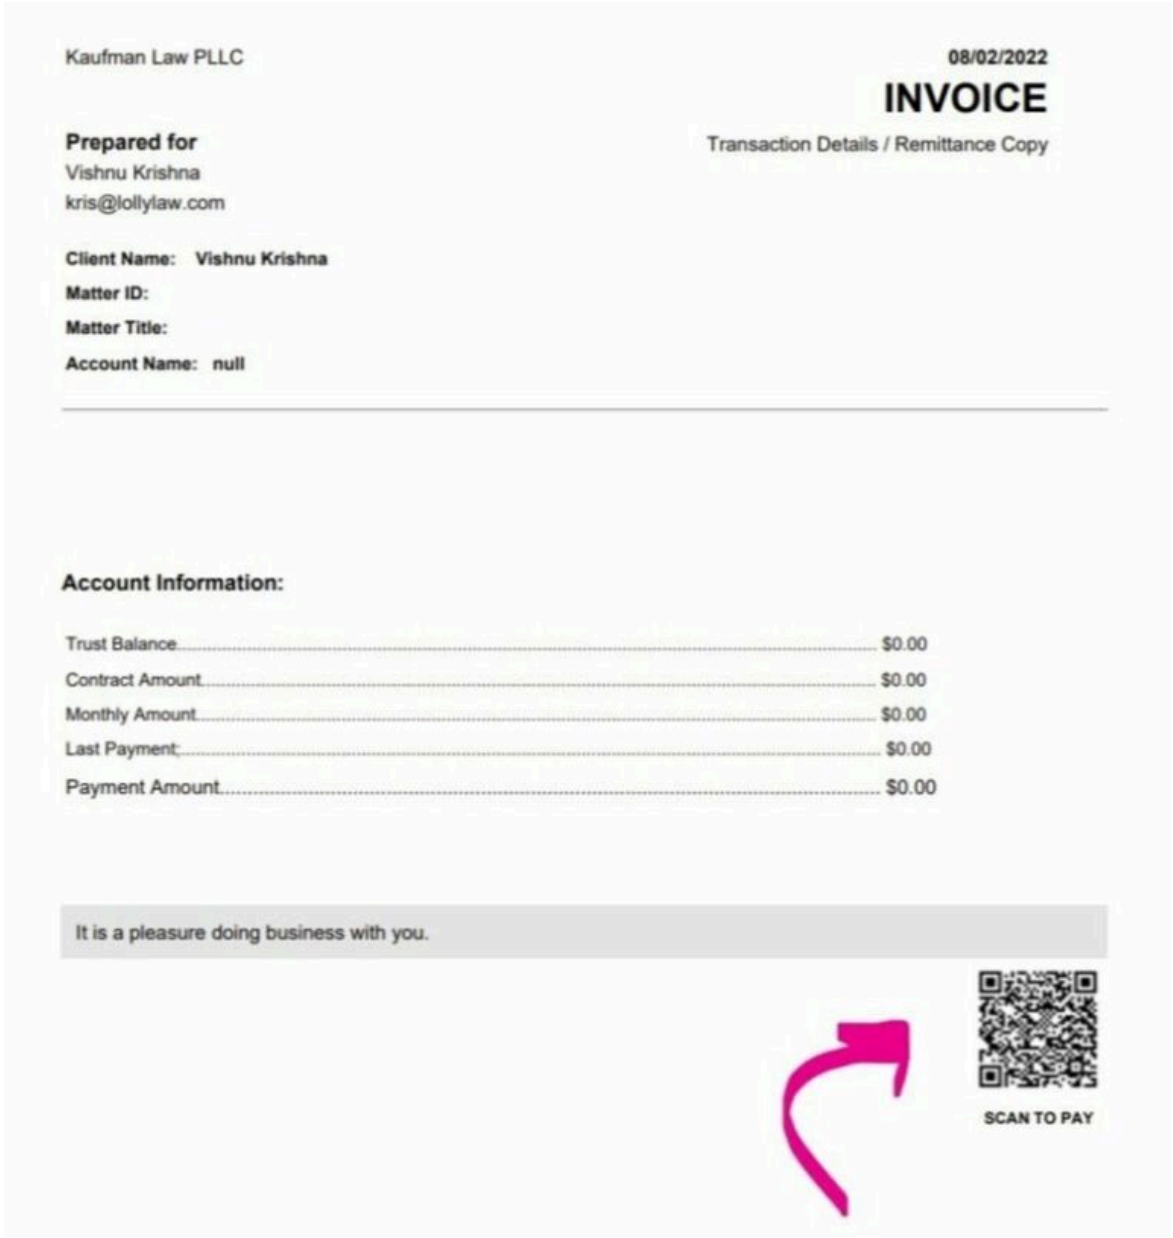

Submit payments via SMS Text Messages

For manual scheduled payments, your clients can submit and authorize the scheduled transaction via SMS text messages. You have the option to set up text message reminders for your clients to authorize the scheduled payment, and can set up confirmation text messages to notify your clients of successful payment transactions.

Submit payments via QR Code

Your clients may submit their payments directly via a QR code within their invoice. The QR code is visible on every invoice, so whenever a scheduled payment deadline is approaching, your clients can simply scan the QR code with their mobile device and submit their payment.

Submit payments via Client Bridge Portal

On top of paying invoices via text messages and QR codes, you may also request and accept payments from the Client Bridge portal via email. With this option, your clients can pay their bills by clicking “View Bill & Pay Online” in the email body. Then, the client will be redirected to the invoice page where they can pick their preferred payment method to submit payment.
